### Quality Policy

Safety Technology International Ltd (STI) provides a service of high standard and it is the company objective to satisfy the specified requirements of customers, and to maintain its commitment to maintain and improve its service to its customers.

In order to monitor and control this objective STI Ltd operates a Quality Management System (QMS) which is continually improved and is designed to satisfy the requirements of BS EN ISO 9001:2015.

The operation of the procedures in the QMS is mandatory on all employees and provides the framework for establishing and reviewing quality objectives.

This will be achieved by:

- Means of formal quality programmes and standards of performance which permit the STI's services and systems to meet the requirements of ISO 9001 as they relate to its operations and the specific needs of its Customers and Interested Parties.
- Maintaining and continually improving all quality activities which control or influence the conformity of our products and affect customer satisfaction.
- Through formal procedures and processes that clearly define and enable STI to be compliant with all applicable requirements
- Conduct and communication of improvement programmes, activities and controls, including any statutory and regulatory requirements within an environment which in itself promotes the conditions required to fulfil these requirements.
- Commitment, support and involvement at all levels of the QMS by the top management of STI Limited. Top management accept overall responsibility and accountability for establishing, implementing and maintaining the quality management system.
- STI ensures the ongoing competence of employees by the provision of training, which will enhance the quality and integrity of the Company's operations. This helps to ensure that the Company's objectives and the associated responsibilities and authorities are understood and fulfilled at all levels.
- To positively contribute to the quality effort by meaningful and timely feedback as structured within the QMS. This Quality Policy and improvement objectives are to be monitored by the top management of STI regularly, including at the Management Review, for ongoing suitability and during internal and third-party audits.

Steve Hunt  
Managing Director
